ABOUT US

Scientific supply, sourcing, and distribution from Ambala Cantt

Avrexon Scientific is a scientific supply company based in Ambala Cantt, Haryana, focused on laboratory glassware, lab plasticware, consumables, microscopes, basic laboratory equipment and School & College lab supplies

We supply dealers, schools, colleges, laboratories, and institutional buyers with a practical product range, fresh quotations, and clear communication. Our focus is on dependable sourcing, careful packing, and long term supply relationships.

With access to Ambala's scientific glassware and laboratory supply ecosystem, Avrexon Scientific aims to support buyers across India with reliable products and professional service.

What We Supply

21+ product lines

Laboratory Glassware

Beakers, flasks, and cylinders
Burettes and pipettes
Reagent and BOD bottles
Test tubes and Petri dishes
Condensers and apparatus

15+ product lines

Lab Consumables

Microscope slides and coverslips
Filter paper and litmus paper
Rubber corks and tubing
Gloves, spatulas, and labels
Droppers and brushes

14+ product lines

Laboratory Plasticware

Wash bottles and funnels
Test tube racks and boxes
Centrifuge and micro tubes
Pipette tips and vials
Sample containers

9+ product lines

Microscopes & Optics

Student microscopes
Compound microscopes
Binocular microscopes
Prepared slides
Accessories and spares

12+ product lines

School & College Lab Supplies

Retort stands and clamps
Bunsen burners and spirit lamps
Dissection trays and forceps
Chemistry and biology kits
Basic physics apparatus

Available on quotation

Basic Lab Equipment

Hot plates and stirrers
Weighing balances
pH and TDS meters
Water baths and centrifuges
Thermometers

WHY AVREXON SCIENTIFIC

Reliable scientific supply, built around clarity, packing, and repeat orders.

Avrexon Scientific supports dealers, laboratories, schools, colleges, and institutional buyers with a practical range of laboratory glassware, plasticware, consumables, microscopes, school & college lab supplies and basic lab equipment.

Our focus is simple: clear communication, current quotations, dependable sourcing, careful packing, and professional documentation for every order.

01 Verified Sourcing

We source products through trusted manufacturing and trading channels, with item specifications confirmed before quotation and dispatch.

02 Glassware Cluster Access

Our Ambala location gives us access to India's established scientific glassware and laboratory supply ecosystem.

03 Careful Packing

Glassware and fragile items are packed with transit risk in mind, using suitable packing based on product type and order quantity.

04 Fresh Quotations

Rates are quoted fresh based on item, quantity, packing, freight, and current market conditions.

GST Invoicing

Proper Tax Documentation

Secure Packing

Dispatch Ready Orders

India Supply Support

Dealer & Institutional Buyers

OUR SUPPLY PROMISE

Clear Communication

We confirm product details, pricing, packing, and dispatch expectations before processing the order.

Professional Documentation

Quotations, invoices, and dispatch details are shared clearly for business and institutional requirements.

Repeat Buyer Focus

Our model is built for long term supply relationships, not one time transactions.

PRODUCT RANGE

Essential laboratory glassware for routine academic, dealer, and institutional supply.

Avrexon Scientific supplies a practical range of laboratory glassware used in schools, colleges, laboratories, dealers, and institutional procurement. Products are available in multiple sizes and specifications, with quotations shared as per quantity, packing, and dispatch requirements.

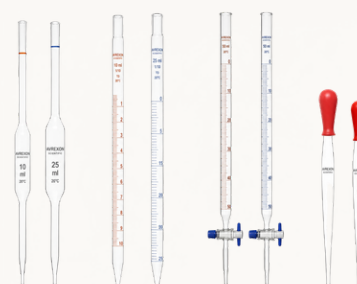

01 Beakers & Flasks

- Beakers
- Conical flasks
- Round bottom flasks
- Flat bottom flasks

02 Measuring Glassware

- Measuring cylinders
- Volumetric flasks
- Graduated cylinders
- Measuring jars

03 Pipettes & Burettes

- Volumetric pipettes
- Graduated pipettes
- Burettes
- Dropping pipettes

04 Laboratory Bottles

- Reagent bottles
- Amber bottles
- BOD bottles
- Dropping bottles

05 Tubes & Dishes

- Test tubes
- Petri dishes
- Watch glasses
- Glass rods

06 Condensers & Apparatus

- Condensers
- Distillation apparatus
- Soxhlet apparatus
- Glass assemblies

Available in multiple sizes. Bulk, dealer, and institutional requirements can be quoted separately.

PRODUCT RANGE • GLASSWARE

Beakers & Flasks

Avrexon Scientific supplies standard laboratory beakers and flasks in borosilicate glass for routine heating, mixing, preparation, and general laboratory use. Available in multiple capacities for dealers, academic institutions, laboratories, and bulk supply requirements.

Product specifications, packing, and available variants may vary by size and supply batch. Final details are confirmed at the quotation stage based on quantity, packing, and dispatch location.

MOST POPULAR

01 Beakers

Capacity	Material Option	Pack Size	Available Variant
5 ml	Borosilicate glass	Per Dozen	Low Form, Tall Form
10 ml	Borosilicate glass	Per Dozen	Low Form, Tall Form
25 ml	Borosilicate glass	Per Dozen	Low Form, Tall Form
50 ml	Borosilicate glass	Per Dozen	Low Form, Tall Form
100 ml	Borosilicate glass	Per Dozen	Low Form, Tall Form
250 ml	Borosilicate glass	Per Dozen	Low Form, Tall Form
500 ml	Borosilicate glass	Per Dozen	Low Form, Tall Form
1000 ml	Borosilicate glass	Per Half Dozen	Low Form, Tall Form
2000 ml	Borosilicate glass	Per Half Dozen	Low Form, Tall Form

02 Conical Flasks

Capacity	Material Option	Pack Size
50 ml	Borosilicate glass	Per Dozen
100 ml	Borosilicate glass	Per Dozen
250 ml	Borosilicate glass	Per Dozen
500 ml	Borosilicate glass	Per Dozen
1000 ml	Borosilicate glass	Per Half Dozen
2000 ml	Borosilicate glass	Per Half Dozen

03 Round Bottom Flasks

Capacity	Neck Type	Material Option	Pack Size
50 ml	Single Neck	Borosilicate glass	Per Dozen
100 ml	Single Neck	Borosilicate glass	Per Dozen
250 ml	Single / Two Neck	Borosilicate glass	Per Dozen
500 ml	Single / Two Neck	Borosilicate glass	Per Half Dozen
1000 ml	Single / Two Neck	Borosilicate glass	Per Half Dozen
2000 ml	Single Neck	Borosilicate glass	Per Half Dozen

Conical Flask/ Round bottom flask also available with standard joint

PRODUCT RANGE • GLASSWARE

Measuring Glassware

Avrexon Scientific supplies a practical range of laboratory measuring glassware used for routine volume measurement, solution preparation, and institutional laboratory requirements. Our measuring cylinders, volumetric flasks, and measuring jars are available in multiple capacities for dealers, laboratories, schools, colleges, and bulk supply requirements.

Product specifications, graduations, packing, and available variants may vary by size and supply batch. Final details are confirmed at the quotation stage based on quantity, packing requirement, and dispatch location.

PRECISION RANGE

01 Measuring Cylinders

Capacity	Material Option	Pack Size	Available Variant
10 ml	Borosilicate glass	Per Dozen	Hexagonal Base / Round Base
25 ml	Borosilicate glass	Per Dozen	Hexagonal Base / Round Base
50 ml	Borosilicate glass	Per Dozen	Hexagonal Base / Round Base
100 ml	Borosilicate glass	Per Dozen	Hexagonal Base / Round Base
250 ml	Borosilicate glass	Per Dozen	Hexagonal Base / Round Base
500 ml	Borosilicate glass	Per Half Dozen	Hexagonal Base / Round Base
1000 ml	Borosilicate glass	Per Half Dozen	Hexagonal Base / Round Base
2000 ml	Borosilicate glass	Per Piece / Half Dozen	Hexagonal Base / Round Base

02 Volumetric Flasks

Capacity	Material Option	Pack Size	Available Variant
10 ml	Borosilicate glass	Per Dozen	With Stopper
25 ml	Borosilicate glass	Per Dozen	With Stopper
50 ml	Borosilicate glass	Per Dozen	With Stopper
100 ml	Borosilicate glass	Per Dozen	With Stopper
250 ml	Borosilicate glass	Per Dozen	With Stopper
500 ml	Borosilicate glass	Per Half Dozen	With Stopper
1000 ml	Borosilicate glass	Per Half Dozen	With Stopper
2000 ml	Borosilicate glass	Per Piece / Half Dozen	With Stopper

Also Available in Amber Colour

03 Measuring Jars

Capacity	Material Option	Pack Size	Available Variant
100 ml	Glass / Plastic	Per Dozen	Graduated
250 ml	Glass / Plastic	Per Dozen	Graduated
500 ml	Glass / Plastic	Per Half Dozen	Graduated
1000 ml	Glass / Plastic	Per Half Dozen	Graduated
2000 ml	Glass / Plastic	Per Piece / Half Dozen	Graduated

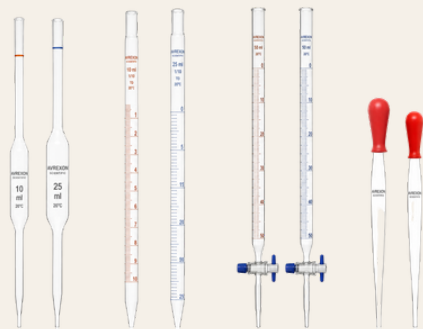

Product images, material details, sizes, packing, and specifications are for reference only. Final product specifications are confirmed at the quotation stage based on availability, supplier batch, and order quantity.

PRODUCT RANGE • GLASSWARE

Pipettes, Burettes & Droppers

Avrexon Scientific supplies laboratory pipettes, burettes, and glass droppers for accurate liquid handling, titration, solution transfer, and routine laboratory use. The range includes volumetric one mark pipettes, graduated serological and Mohr type pipettes, medium wall burettes, and glass droppers with rubber teat.

Available sizes, packing, and specifications may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, packing requirement, and dispatch location.

LIQUID HANDLING

01 Volumetric Pipettes, One Mark, Class B

Capacity	Material Option	Pack Size	Available Variant
1 ml	Borosilicate glass	As per order	Single Mark
2 ml	Borosilicate glass	As per order	Single Mark
5 ml	Borosilicate glass	As per order	Single Mark
10 ml	Borosilicate glass	As per order	Single Mark
20 ml	Borosilicate glass	As per order	Single Mark
25 ml	Borosilicate glass	As per order	Single Mark
50 ml	Borosilicate glass	As per order	Single Mark
100ml	Borosilicate glass	As per order	Single Mark

02 Graduated Pipettes, Serological & Mohr Type

Capacity	Material Option	Pack Size	Available Variant
0.1 ml	Borosilicate glass	As per order	Graduated, Class B
0.2 ml	Borosilicate glass	As per order	Graduated, Class B
0.5 ml	Borosilicate glass	As per order	Graduated, Class B
1 ml	Borosilicate glass	As per order	Graduated, Class B
2 ml	Borosilicate glass	As per order	Graduated, Class B
5 ml	Borosilicate glass	As per order	Graduated, Class B
10 ml	Borosilicate glass	As per order	Graduated, Class B
25 ml	Borosilicate glass	As per order	Graduated, Class B

Product images, material details, sizes, packing, and specifications are for reference only. Final product specifications are confirmed at the quotation stage based on availability, supplier batch, and order quantity.

03 Burettes, Medium Wall

Capacity	Material Option	Pack Size	Available Variant
5 ml	Borosilicate glass	Per Piece	Rotaflow / Glass Stopcock
10 ml	Borosilicate glass	Per Piece	Rotaflow / Glass Stopcock
25 ml	Borosilicate glass	Per Piece	Rotaflow / Glass Stopcock
50 ml	Borosilicate glass	Per Piece	Rotaflow / Glass Stopcock
100 ml	Borosilicate glass	Per Piece	Rotaflow / Glass Stopcock

04 Glass Droppers with Rubber Teat

Capacity	Material Option	Pack Size	Available Variant
10cm	Neutral glass	As per order	With Rubber Teat
15cm	Neutral glass	As per order	With Rubber Teat
20cm	Neutral glass	As per order	With Rubber Teat

Product images, material details, sizes, packing, and specifications are for reference only. Final product specifications are confirmed at the quotation stage based on availability, supplier batch, and order quantity.

PRODUCT RANGE • GLASSWARE

Laboratory Bottles

Avrexon Scientific supplies laboratory bottles for storage, sampling, reagent handling, and routine institutional laboratory use. The range includes reagent bottles, amber reagent bottles, BOD bottles, and dropping bottles in multiple capacities for schools, colleges, laboratories, dealers, and bulk supply requirements.

Available sizes, packing, material details, and specifications may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, packing requirement, and dispatch location.

STORAGE &
REAGENTS

01 Reagent Bottles with Hollow / Solid Stopper

Capacity	Material Option	Stopper Option	Available Variant
30 ml	Glass	Hollow / Solid Stopper	Clear
60 ml	Glass	Hollow / Solid Stopper	Clear
125 ml	Glass	Hollow / Solid Stopper	Clear
250 ml	Glass	Hollow / Solid Stopper	Clear
500 ml	Glass	Hollow / Solid Stopper	Clear
1000 ml	Glass	Hollow / Solid Stopper	Clear
2000 ml	Glass	Hollow / Solid Stopper	Clear

02 Reagent Bottles with Screw Cap

Capacity	Material Option	Cap Type	Available Variant
30 ml	Glass	Screw Cap	Clear
60 ml	Glass	Screw Cap	Clear
125 ml	Glass	Screw Cap	Clear
250 ml	Glass	Screw Cap	Clear
500 ml	Glass	Screw Cap	Clear
1000 ml	Glass	Screw Cap	Clear
2000 ml	Glass	Screw Cap	Clear
5000 ml	Glass	Screw Cap	Clear

03 Amber Reagent Bottles

Capacity	Material Option	Bottle Type	Available Variant
30 ml	Amber glass	Reagent Bottle	With Hollow Stopper
60 ml	Amber glass	Reagent Bottle	With Hollow Stopper
125 ml	Amber glass	Reagent Bottle	With Hollow Stopper
250 ml	Amber glass	Reagent Bottle	With Hollow Stopper
500 ml	Amber glass	Reagent Bottle	With Hollow Stopper
1000 ml	Amber glass	Reagent Bottle	With Hollow Stopper
2000 ml	Amber glass	Reagent Bottle	With Hollow Stopper

04 BOD Bottles & Gas Washing Bottle

Product	Size / Capacity	Material Option	Available Variant
BOD Bottle	125 ml	Glass	Laboratory Use
BOD Bottle	300 ml	Glass	Laboratory Use
Gas Washing Bottle	125 ml	Glass	With head
Gas Washing Bottle	250 ml	Glass	With head
Gas Washing Bottle	500 ml	Glass	With head

Product images, sizes, material details, packing, and specifications are for reference only. Final product specifications are confirmed at the quotation stage based on availability, supplier batch, and order quantity.

PRODUCT RANGE • GLASSWARE

Tubes & Dishes

Avrexon Scientific supplies laboratory tubes and dishes for routine sample handling, culture work, observation, storage, and academic laboratory use. The range includes test tubes, culture tubes, graduated tubes, and petri dishes in multiple sizes for schools, colleges, laboratories, dealers, and institutional supply requirements.

Available sizes, packing, material details, and specifications may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, packing requirement, and dispatch location.

01 Test Tubes

Size	Material Option	Packing	Available Variant
10 x 75 mm	Borosilicate glass	Pack of 100 pcs	With Rim / Without Rim
12 x 75 mm	Borosilicate glass	Pack of 100 pcs	With Rim / Without Rim
12 x 100 mm	Borosilicate glass	Pack of 100 pcs	With Rim / Without Rim
15 x 125 mm	Borosilicate glass	Pack of 100 pcs	With Rim / Without Rim
15 x 150 mm	Borosilicate glass	Pack of 100 pcs	With Rim / Without Rim
18 x 150 mm	Borosilicate glass	Pack of 100 pcs	With Rim / Without Rim
25 x 150 mm	Borosilicate glass	Pack of 100 pcs	With Rim / Without Rim
25 x 200 mm	Borosilicate glass	Pack of 100 pcs	With Rim / Without Rim

Larger sizes available on request: 32 x 200 mm and 38 x 200 mm.

02 Culture Tubes with Screw Cap

Capacity	Bottom Type	Material Option	Available Variant
5 ml	Round Bottom	Glass	With Screw Cap
10 ml	Round Bottom	Glass	With Screw Cap
15 ml	Round Bottom	Glass	With Screw Cap
30 ml	Round Bottom	Glass	With Screw Cap
50 ml	Round Bottom	Glass	With Screw Cap
60 ml	Round Bottom	Glass	With Screw Cap
5 ml	Flat Bottom	Glass	With Screw Cap
15 ml	Flat Bottom	Glass	With Screw Cap
30 ml	Flat Bottom	Glass	With Screw Cap
50 ml	Flat Bottom	Glass	With Screw Cap
60 ml	Flat Bottom	Glass	With Screw Cap

Product images, sizes, material details, packing, and specifications are for reference only. Final product specifications are confirmed at the quotation stage based on availability, supplier batch, and order quantity.

PRODUCT RANGE • GLASSWARE

03 Graduated Test Tubes

Capacity	Material Option	Stopper Option	Available Variant
5 ml	Glass	With Stopper	Graduated
10 ml	Glass	With Stopper	Graduated
15 ml	Glass	With Stopper	Graduated
25 ml	Glass	With Stopper	Graduated
50 ml	Glass	With Stopper	Graduated
100 ml	Glass	With Stopper	Graduated

04 Petri Dishes

Size	Material Option	Packing	Available Variant
50 mm	Glass	As per order	Plain
75 mm	Glass	As per order	Plain
100 mm	Glass	As per order	Plain
150 mm	Glass	As per order	Plain
200 mm	Glass	As per order	Plain

Additional Items Available on Request:

Watch glasses, glass rods, sample tubes, and related laboratory glassware may be supplied based on availability and order quantity.

Product images, sizes, material details, packing, and specifications are for reference only. Final product specifications are confirmed at the quotation stage based on availability, supplier batch, and order quantity.

PRODUCT RANGE • GLASSWARE

Condensers & Apparatus

Avrexon Scientific supplies laboratory condensers and glass apparatus for distillation, extraction, reflux, and routine laboratory setup requirements. The range includes Liebig condensers, bulb condensers, coil condensers, air condensers, Soxhlet extraction apparatus, and distillation assemblies for academic, institutional, dealer, and laboratory supply needs.

Available sizes, joint details, packing, and specifications may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, packing requirement, and dispatch location.

DISTILLATION & EXTRACTION

01 Condensers with Interchangeable Joints

Product	Effective Length	Material Option	Available Variant
Liebig Condenser	200 mm	Glass	With Interchangeable Joints
Liebig Condenser	300 mm	Glass	With Interchangeable Joints
Liebig Condenser	400 mm	Glass	With Interchangeable Joints
Liebig Condenser	500 mm	Glass	With Interchangeable Joints
Bulb Condenser	200 mm	Glass	With Interchangeable Joints
Bulb Condenser	300 mm	Glass	With Interchangeable Joints
Bulb Condenser	400 mm	Glass	With Interchangeable Joints
Coil Condenser	300 mm	Glass	With Interchangeable Joints
Coil Condenser	400 mm	Glass	With Interchangeable Joints
Coil Condenser	500 mm	Glass	With Interchangeable Joints

02 Air Condensers with Cone

Effective Length	Material Option	Connection Type	Available Variant
300 mm	Glass	Cone	Air Condenser
400 mm	Glass	Cone	Air Condenser
500 mm	Glass	Cone	Air Condenser
600 mm	Glass	Cone	Air Condenser
1000 mm	Glass	Cone	Air Condenser

03 Soxhlet Extraction Apparatus with Flask

Capacity	Material Option	Assembly Type	Available Variant
60 ml	Glass	Soxhlet Apparatus	With Flask
100 ml	Glass	Soxhlet Apparatus	With Flask
200 ml	Glass	Soxhlet Apparatus	With Flask
400 ml	Glass	Soxhlet Apparatus	With Flask

04 Distillation Assemblies

Product	Capacity / Output	Material Option	Available Variant
Distillation Assembly	250 ml	Glass	Complete Glass Assembly
Distillation Assembly	500 ml	Glass	Complete Glass Assembly
Distillation Assembly	1000 ml	Glass	Complete Glass Assembly
Distillation Assembly	2000 ml	Glass	Complete Glass Assembly
Electric Distillation Assembly	3 litre flask	Glass / Electrical Setup	With Auto Cut
Electric Distillation Assembly	5 litre flask	Glass / Electrical Setup	With Auto Cut
Electric Distillation Assembly	10 litre flask	Glass / Electrical Setup	With Auto Cut
Horizontal Distillation Apparatus	1.5 litre output	Glass / Electrical Setup	With Built Auto Cut

Note: Distillation assembly includes RB flask, Liebig condenser, receiver adaptor, and bend.

Product images, sizes, material details, packing, joint details, and specifications are for reference only. Final product specifications are confirmed at the quotation stage based on availability, supplier batch, and order quantity.

PRODUCT RANGE • GLASSWARE

General Laboratory Glassware & Accessories

Avrexon Scientific supplies general laboratory glassware and routine lab accessories for schools, colleges, laboratories, dealers, and institutional supply requirements. This range includes commonly used items such as funnels, watch glasses, Petri dishes, density bottles, weighing bottles, dropping bottles, glass rods, connectors, and other utility glassware required for regular laboratory operations.

Available sizes, packing, material details, and specifications may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, packing requirement, and dispatch location.

01 Glass Funnels & Watch Glasses

Product	Available Sizes	Material	Available Variant
Glass Funnel	25, 50, 65, 75, 100, 125, 150 mm	Glass	Plain stem
Watch Glass	50, 75, 100, 150 mm	Glass	Standard

02 Density Bottles & Weighing Bottles

Product	Capacity / Size	Material	Available Variant
Density Bottle	10, 25, 50, 100 ml	Glass	Glass stopper / Teflon stopper
Weighing Bottle, Tall Form	5, 15, 20, 25, 60 ml	Glass	With lid / stopper
Weighing Bottle, Squat Form	20, 40, 50 ml	Glass	With lid / stopper

Detailed size references: Tall Form: 5 ml 20 x 40 mm, 15 ml 25 x 60 mm, 20 ml 40 x 30 mm, 25 ml 30 x 65 mm, 60 ml 40 x 90 mm. Squat Form: 20 ml 50 x 35 mm, 40 ml 60 x 40 mm, 50 ml 50 x 50 mm.

03 Dropping Bottles & Utility Glassware

Product	Capacity / Size	Material	Available Variant
Dropping Bottle	30, 60, 125 ml	Glass	With dropper
Gas Jar	Available on request	Glass	Standard
Glass Rod	Available on request	Glass	Standard
Glass Tubing	Available on request	Glass	Standard
Adapters / Connectors	Available on request	Glass	Laboratory use

Note: Additional sizes and custom glassware items can be arranged based on order quantity and supplier availability.

Product images, sizes, material details, packing, and specifications are for reference only. Final product specifications are confirmed at the quotation stage based on availability, supplier batch, and order quantity.

PRODUCT RANGE • SPECIALIZED GLASSWARE

Specialized Laboratory Glassware & Apparatus

Avrexon Scientific supplies specialized laboratory glassware and apparatus for schools, colleges, laboratories, dealers, and institutional procurement requirements. This range includes desiccators, separating funnels, filter flasks, Kjeldahl flasks, Kipp's apparatus, sintered glassware, cones, sockets, and other specialized utility glassware.

Available sizes, joints, grades, packing, and specifications may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, required specification, packing requirement, and dispatch location.

01 Desiccators, Cones & Sockets

Product	Available Sizes / Options	Material	Available Variant
Glass Desiccator	120, 150, 210, 240, 300 mm	Glass	Plain / Vacuum option
Cones	B10, B14, B19, B24, B29, B34	Glass	Plain
Sockets	B10, B14, B19, B24, B29, B34	Glass	Standard joint
Museum Jar	Available on request	Glass	With glass cover

02 Funnels, Flasks & Filtration Glassware

Product	Available Sizes / Options	Material	Available Variant
Separating Funnel	25 ml to 5000 ml	Glass	Rotaflo / Glass stopcock
Kjeldahl Flask	100, 300, 500, 800 ml	Glass	With joint B24
Filter Flask	100, 250, 500, 1000, 2000 ml	Glass	Bolt neck
Sintered Crucible	15, 30, 50 ml	Glass	G1, G2, G3, G4
Sintered Buchner Funnel	35 ml to 1000 ml	Glass	G1, G2, G3, G4

03 Special Purpose Glassware

Product	Available Sizes / Options	Material	Available Variant
Nessler Cylinder	50, 100 ml	Glass	Standard
Iodine Flask	100, 250, 500 ml	Glass	Standard
Pyknometer	5, 10, 25 ml	Glass	Standard
Thiele Tube	18 x 150, 25 x 150 mm	Glass	Standard
Chromatography Sprayer	100, 250 ml	Glass	Laboratory use

04 Laboratory Apparatus & Accessories

Product	Available Sizes / Options	Material	Available Variant
Kipp's Apparatus	250, 500, 1000 ml	Glass	Standard
Stalagmometer	Available on request	Glass	Standard
Viscometer, College Pattern	Available on request	Glass	Standard
Teflon Coated Magnets	6 x 12 mm to 9 x 75 mm	Teflon coated	With centre ring
Membrane Filtration Assembly	47 mm dia with 1 litre flask	Glass	Laboratory filtration setup

Note: Specialized glassware is supplied based on availability, required specifications, order quantity, and packing feasibility.

Product images, sizes, material details, packing, joint details, and specifications are for reference only. Final product specifications are confirmed at the quotation stage based on availability, supplier batch, and order quantity.

PRODUCT RANGE

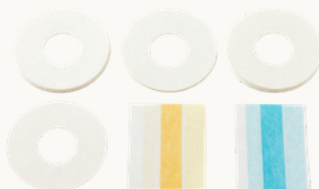

Essential lab consumables for routine academic, dealer, and institutional supply.

Avrexon Scientific supplies a practical range of laboratory consumables used in schools, colleges, laboratories, dealers, and institutional procurement. Products are available in standard pack sizes and commonly used variants, with quotations shared as per quantity, packing, and dispatch requirements.

01 Microscopy Consumables

- Microscope slides
- Cover slips
- Lens cleaning paper

02 Paper Consumables

- Filter paper
- pH paper
- Litmus paper

03 Rubber Consumables

- Rubber corks
- Rubber tubing
- Rubber stoppers

04 Cleaning & Handling

- Test tube brushes
- Droppers
- Cotton rolls

05 Safety & Utility

- Gloves
- Labels
- Lab markers

06 Lab Tools & Accessories

- Spatulas
- Lab spoons
- Scoop spoons

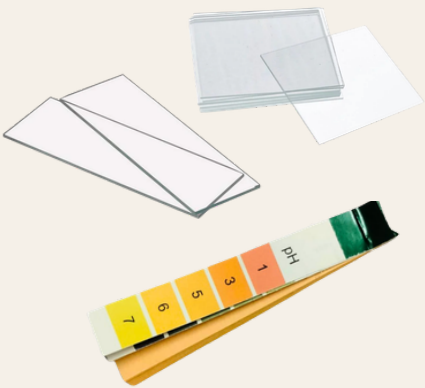

Available in standard pack sizes. Bulk, dealer, and institutional requirements can be quoted separately.

PRODUCT RANGE ♦ MICROSCOPY, PAPER & RUBBER CONSUMABLES

Microscopy, Paper & Rubber Consumables

Avrexon Scientific supplies routine laboratory consumables for microscopy, filtration, pH testing, sealing, and general laboratory use. The range includes microscope slides, cover slips, lens cleaning paper, filter paper, pH paper, litmus paper, rubber corks, rubber tubing, and rubber stoppers for academic, institutional, dealer, and laboratory supply requirements.

Available sizes, packing, material details, and specifications may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, packing requirement, quantity, and dispatch location.

01 Microscopy Consumables

Product	Variant / Size	Packing	Application
Microscope Slides	Standard microscope slides	Box of 50 / 100	Routine slide preparation and specimen mounting
Cover Slips	Standard	Standard pack	Covering specimens for microscopy
Lens Cleaning Paper	Soft tissue paper	Standard pack	Cleaning microscope lenses and optical surfaces

02 Paper Consumables

Product	Variant / Size	Packing	Application
Filter Paper	Round / standard laboratory grade	Standard pack	Routine filtration
pH Paper	Standard pH testing paper	Standard pack	Basic pH indication
Litmus Paper	Red / Blue	Standard pack	Acid and base indication

03 Rubber Consumables

Product	Variant / Size	Packing	Application
Rubber Corks	Standard assorted sizes	Standard pack	Sealing laboratory glassware
Rubber Tubing	General laboratory use	Standard coil	Liquid and gas connection
Rubber Stoppers	Standard assorted sizes	Standard pack	Sealing laboratory apparatus

Product images, sizes, packing, and specifications are for reference only. Final availability and specifications are confirmed at quotation stage based on stock, order quantity, and dispatch requirements.

PRODUCT RANGE ♦ CLEANING, HANDLING & LAB UTILITY

Cleaning, Handling & Lab Utility Consumables

Avrexon Scientific supplies routine laboratory consumables and utility items used for cleaning, handling, sample preparation, labeling, and general laboratory operations. The range includes test tube brushes, glass droppers, cotton rolls, gloves, laboratory labels, lab markers, spatulas, and scoop spoons for academic, institutional, dealer, and laboratory supply requirements.

Available sizes, packing, material details, and specifications may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, packing requirement, quantity, and dispatch location.

04 Cleaning & Handling

Product	Variant / Size	Packing	Application
Test Tube Brushes	Assorted sizes	Standard pack	Cleaning test tubes and narrow glassware
Droppers	Glass droppers / general laboratory use	Standard pack	Liquid transfer and small-volume dispensing
Cotton Rolls	Laboratory utility cotton rolls	Standard pack	Cleaning, wiping, and general lab handling

05 Safety & Utility

Product	Variant / Size	Packing	Application
Gloves	General laboratory gloves	Standard pack	Hand protection during routine lab handling
Labels	Laboratory labeling stickers	Standard pack	Sample, bottle, and container identification
Lab Markers	Laboratory marking pens	Standard pack	Writing on glassware, labels, and containers

06 Lab Tools & Accessories

Product	Variant / Size	Packing	Application
Spatulas	Stainless steel / laboratory use	Standard pack	Handling powders and small sample quantities
Scoop Spoons	Stainless steel / assorted sizes	Standard pack	Scooping powders, salts, and dry materials
Lab Spoons	Stainless steel / assorted sizes	Standard pack	General laboratory material handling

Product images, sizes, packing, and specifications are for reference only. Final availability and specifications are confirmed at quotation stage based on stock, order quantity, and dispatch requirements.

PRODUCT RANGE

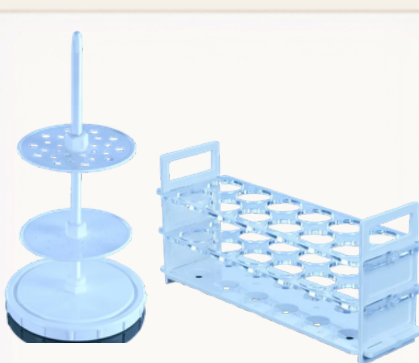

Laboratory plasticware for routine lab handling, storage, measuring, and sample preparation.

Avrexon Scientific supplies a practical range of laboratory plasticware used across schools, colleges, laboratories, dealers, and institutional procurement. The range includes wash bottles, plastic funnels, racks, stands, tubes, containers, tips, vials, plastic beakers, petri plates, and storage accessories for routine laboratory use. Products are available in standard pack sizes and commonly used variants, with quotations shared as per quantity, packing, supplier batch, and dispatch requirements.

01 Liquid Handling Plasticware

- Wash bottles
- Plastic funnels
- Measuring jugs

02 Racks & Stands

- Test tube racks
- Pipette stands
- Storage boxes

03 Sample Storage

- Sample containers
- Vials
- Reagent bottle caps

04 Centrifuge Consumables

- Centrifuge tubes
- Microcentrifuge tubes
- Tube storage accessories

05 Pipette & Tip Accessories

- Pipette tips
- Tip boxes
- Pipetting accessories

06 General Plastic Labware

- Plastic beakers
- Plastic petri plates
- Plastic beakers / jars / utility containers

Available in standard pack sizes. Bulk, dealer, and institutional requirements can be quoted separately.

PRODUCT RANGE • LIQUID HANDLING PLASTICWARE

Liquid Handling Plasticware

Wash bottles, plastic funnels, measuring jugs, reagent bottles and measuring cylinders for routine laboratory liquid handling, transfer, rinsing, and measurement requirements.

Avrexon Scientific supplies practical laboratory plasticware used for routine liquid handling, washing, pouring, transfer, and approximate measurement applications. The range includes wash bottles, plastic funnels, and measuring jugs suitable for schools, colleges, laboratories, dealers, and institutional procurement requirements.

Available sizes, materials, colours, and packing may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, packing requirement, and dispatch location.

01 Wash Bottles

Product	Common Variants / Capacity	Typical Use
Wash Bottle	125 ml, 250 ml, 500 ml, 1000 ml, 2000ml, 5000ml	Solvent dispensing, rinsing, washing
Narrow Mouth Wash Bottle	As available	Controlled liquid dispensing
Labelled / Colour Cap Wash Bottle	As available	Identification of different liquids

Commonly used for distilled water, rinsing, cleaning, and routine laboratory liquid dispensing.

02 Plastic Funnels

Product	Common Variants / Size	Typical Use
Plastic Funnel	Small, medium, large sizes	Liquid transfer and filtration support
Powder Funnel	As available	Transfer of powders and granular materials
Wide Mouth Funnel	As available	General laboratory and utility transfer

Used for safe transfer of liquids, powders, and routine laboratory materials into bottles, containers, and jars.

03 Measuring Jugs

Product	Common Variants / Capacity	Typical Use
Plastic Measuring Jug	250 ml, 500 ml, 1000 ml, 2000 ml	Approximate measurement and pouring
Graduated Measuring Jug	As available	Routine lab measurement and dispensing
Utility Measuring Jug	As available	General laboratory and institutional use

Suitable for routine measuring, pouring, and handling of non-critical laboratory liquids.

04 REAGENT BOTTLE

Product	Common Variants / Capacity	Typical Use
Plastic Reagent Bottle N/M	4 ml, 8 ml, 15 ml, 30 ml, 125ml, 250ml	to store liquid or powder chemicals

05 MEASURING CYLINDER

Product	Common Variants / Capacity	Typical Use
Plastic Measuring Cylinder	10 ml, 25 ml, 50 ml, 100 ml, 250ml, 500ml, 2000ml	Approximate liquid measurement and pouring

Available in standard laboratory pack sizes. Bulk, dealer, and institutional requirements can be quoted separately.

PRODUCT RANGE

Racks, Stands, Centrifuge Tubes & Sample Storage Plasticware

Avrexon Scientific supplies practical laboratory plasticware used for holding, organising, storing, and handling routine laboratory samples and accessories. The range includes test tube racks, pipette stands, storage boxes, sample containers, vials, and replacement caps for schools, colleges, laboratories, dealers, and institutional procurement requirements.

Available sizes, colours, materials, packing, and configurations may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, packing requirement, and dispatch location.

01 Racks & Stands

Product	Variant / Size	Application
Test tube racks	Multiple hole formats, assorted colours	Holding and organising test tubes
Pipette stands	Vertical, circular, bench-top types	Holding pipettes during routine use
Storage boxes	Tube boxes, utility storage boxes	Storage of tubes, tips, and small lab items

Used for laboratory bench organisation, safe placement, and routine storage of tubes, pipettes, and small accessories.

02 Sample Storage

Product	Variant / Size	Application
Sample containers	Small, medium, large capacities	Routine sample collection and storage
Plastic vials	Assorted capacities and cap types	Small sample storage and handling
Reagent bottle caps / closures	As available	Replacement caps and bottle closure support

Suitable for routine sample collection, storage, handling, and laboratory inventory organisation.

03 Centrifuge

Product	Variant / Size	Application
Centrifuge tubes	15 ml, 50 ml	Sample handling, centrifugation, storage
Microcentrifuge tubes	0.5 ml, 1.5 ml, 2.0 ml	Small-volume sample preparation and storage
Tube storage accessories	Tube racks, storage formats	Organised holding and handling of centrifuge tubes

Suitable for routine laboratory sample preparation, small-volume handling, centrifugation support, and storage applications.

Product images, sizes, packing, and specifications are for reference only. Final availability and specifications are confirmed at quotation stage based on stock, order quantity, and dispatch requirements.

PRODUCT RANGE

Pipette tips and general plastic labware for routine laboratory use.

Avrexon Scientific supplies routine laboratory plasticware and pipetting accessories used for liquid transfer, sample handling, storage, measurement, and general laboratory work. These products are commonly used in schools, colleges, research laboratories, diagnostic setups, dealers, and institutional procurement requirements where reliable, practical, and easy-to-use plastic labware is required.

The range includes pipette tips, tip boxes, pipetting accessories, plastic beakers, plastic petri plates, and general utility plasticware for day-to-day laboratory applications. These items support routine sample preparation, liquid dispensing, culture-related handling, approximate measuring, mixing, pouring, storage, and organised bench-top use. Available capacities, colours, materials, packing, and specifications may vary by supplier batch and order quantity. Final product details are confirmed at the quotation stage based on availability, packing requirement, quantity, and dispatch location.

01 Pipette & Tip Accessories

Product	Variant / Size	Application
Pipette tips	Assorted capacities	Routine liquid transfer and dispensing
Tip boxes	As available	Storage and organised handling of pipette tips
Pipetting accessories	As available	Support items for routine pipetting work

Suitable for routine sample handling, liquid transfer, and organised pipetting applications in laboratories and educational institutions.

02 General Plastic Labware

Product	Variant / Size	Application
Plastic beakers	Assorted capacities	Approximate measuring, mixing, and pouring
Plastic petri plates	Standard laboratory sizes	Routine sample handling and culture-related use
General utility plasticware	As available	General laboratory and institutional use

Used for routine measuring, handling, storage, and day-to-day laboratory utility applications.

Product images, sizes, packing, and specifications are for reference only. Final availability and specifications are confirmed at quotation stage based on stock, order quantity, and dispatch requirements.

PRODUCT RANGE

Microscopes and optical accessories for teaching, routine laboratory observation, and institutional science requirements.

Avrexon Scientific supplies a selected range of microscopes and optical accessories for schools, colleges, laboratories, training institutes, dealers, and institutional procurement requirements. The range includes student microscopes, dissecting microscopes, compound microscopes, binocular microscopes, stereo microscopes, digital microscope options, prepared slides, immersion oil, lens cleaning accessories, and routine microscopy support items.

01 Student & Educational Microscopes

- Student microscopes
- Junior microscopes
- School laboratory microscopes

02 Compound Microscopes

- Single nose microscopes
- Medical microscopes
- Inclined medical microscopes

03 Dissecting & Stereo Microscopes

- Dissecting microscopes
- Stereo microscopes
- Hand and table microtomes

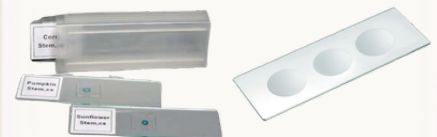

04 Binocular & Advanced Microscopes

- Binocular research microscopes
- Co-axial binocular microscopes
- Trinocular microscopes

05 Digital & Projection Microscopy

- Digital microscope options
- Projection microscopes
- Camera attachment microscopes

06 Microscopy Accessories

- Prepared slides
- Cover slips & cavity slides
- Immersion oil & lens cleaning accessories

Available in standard pack sizes. Bulk, dealer, and institutional requirements can be quoted separately.

PRODUCT RANGE

Student, Compound & Dissecting Microscopes

Avrexon Scientific supplies routine educational and laboratory microscopes for schools, colleges, training institutes, laboratories, dealers, and institutional procurement requirements. The range includes student microscopes, junior microscopes, compound microscopes, medical microscopes, inclined microscopes, dissecting microscopes, stereo microscopes, and related teaching-use optical instruments.

Available models, optical combinations, illumination type, body construction, packing, and accessories may vary by supplier batch and order quantity. Final specifications are confirmed at the quotation stage based on requirement, availability, and dispatch location.

01 Student & Educational Microscopes

Product	Variant / Type	Application
Student microscope	Standard school laboratory model	Basic observation and teaching use
Junior microscope	Entry-level educational model	School-level practical demonstrations
School laboratory microscope	Routine educational configuration	Biology practicals and classroom laboratory use

Suitable for schools, coaching institutes, junior laboratories, and routine science education requirements.

02 Compound Microscopes

Product	Variant / Type	Application
Single nose microscope	Basic compound microscope	Routine specimen observation
Medical microscope	Standard laboratory-use model	Cell, slide, and micro-organism observation
Inclined medical microscope	Inclined body model	Comfortable routine laboratory observation

Used for routine microscopy work in schools, colleges, laboratories, and training setups.

03 Dissecting & Stereo Microscopes

Product	Variant / Type	Application
Dissecting microscope	Basic dissecting model	Low magnification observation and dissection work
Stereo microscope	Binocular or stereo viewing model	Surface observation and specimen inspection
Hand and table microtome	Manual section-cutting support	Biology practicals and prepared slide work

Suitable for biology laboratories, specimen study, dissection work, and educational practical setups.

Product images, optical details, packing, and specifications are for reference only. Final model availability and specifications are confirmed at quotation stage.

PRODUCT RANGE

Advanced Microscopes, Digital Microscopy & Accessories

Avrexon Scientific supplies advanced microscope models and routine microscopy accessories for educational laboratories, colleges, research training setups, dealers, and institutional procurement requirements. The range includes binocular research microscopes, co-axial binocular microscopes, trinocular microscopes, digital microscope options, projection microscopes, camera attachment microscopes, prepared slides, cover slips, cavity slides, immersion oil, and lens cleaning accessories.

Available models, optical combinations, illumination systems, camera compatibility, accessories, packing, and specifications may vary by supplier batch and order quantity. Final details are confirmed at the quotation stage based on requirement, availability, and dispatch location.

04 Binocular & Advanced Microscopes

Product	Variant / Type	Application
Binocular research microscope	Binocular head research model	Advanced slide observation and laboratory teaching
Co-axial binocular microscope	Co-axial focusing model	Smooth focusing and routine laboratory microscopy
Trinocular microscope	Trinocular head model	Microscopy observation with camera attachment support

Suitable for colleges, training laboratories, research teaching setups, and advanced institutional microscopy requirements.

05 Digital & Projection Microscopy

Product	Variant / Type	Application
Digital microscope options	Microscope with digital viewing support	Classroom display, documentation, and demonstration use
Projection microscope	Projection viewing model	Group teaching and enlarged specimen display
Camera attachment microscope	Microscope with camera attachment facility	Image capture, documentation, and digital observation support

Used for classroom demonstrations, digital documentation, visual teaching, and group microscopy observation.

06 Microscopy Accessories

Product	Variant / Type	Application
Prepared slides	Botany and zoology slide sets	School and college practical demonstrations
Cover slips & cavity slides	Square, round, and cavity slide formats	Slide preparation and specimen mounting
Immersion oil & lens cleaning accessories	Routine microscope maintenance items	Optical clarity, lens care, and microscopy support

Suitable for routine slide preparation, microscopy practicals, lens maintenance, and laboratory teaching support.

Product images, optical details, packing, and specifications are for reference only. Final model availability and specifications are confirmed at quotation stage.

PRODUCT RANGE

School and college laboratory essentials for practical science education, routine experiments, and institutional laboratory requirements.

Avrexon Scientific supplies a selected range of laboratory stands, burners, dissection tools, practical training kits, and essential laboratory accessories used in schools, colleges, training institutes, and educational laboratories. The range includes retort stands, boss heads, clamps, tripod stands, wire gauze, burners, spirit lamps, dissection equipment, chemistry and biology kits, basic physics apparatus, and routine laboratory support items designed for practical science instruction and laboratory activities.

01 Laboratory Stands & Support Systems

- Retort stands
- Boss heads
- Utility clamps
- Laboratory support accessories

02 Heating & Flame Equipment

- Bunsen burners
- Spirit lamps
- Laboratory burners
- Heating accessories

03 Tripods & Heating Supports

- Tripod stands
- Wire gauze
- Heating support assemblies
- Practical laboratory supports

04 Dissection & Biology Tools

- Forceps
- Dissection trays
- Dissection accessories
- Biology practical tools

05 Physics Apparatus & Measurement Instruments

- Vernier callipers & micrometers
- Voltmeters, ammeters & multimeters
- Physics experiment apparatus

Available in standard pack sizes. Bulk, dealer, and institutional requirements can be quoted separately.

PRODUCT RANGE

Laboratory Supports & Heating Equipment

Avrexon Scientific supplies laboratory stands, burners, heating supports, and practical laboratory accessories used in schools, colleges, training institutes, and routine laboratory environments. The range includes retort stands, boss heads, utility clamps, laboratory burners, spirit lamps, tripod stands, wire gauze, and related support equipment required for practical science education and laboratory activities.

Product specifications, dimensions, materials, and available variants may vary by supply batch and manufacturer. Final details are confirmed at the quotation stage based on quantity, packing requirements, and dispatch location.

01 Laboratory Stands & Support Systems

Product	Variant / Type	Application
Retort Stand	Standard Laboratory Type	used to hold, secure, and elevate glassware and equipment
Boss Head	Single & Double Type	used to securely attach clamps, rings, and other apparatus
Utility Clamp	Various Jaw Sizes	securely hold, position, and stabilize cylindrical objects
Burette Clamp	Single & Double Position	securely hold one or two burettes on a retort stand
Three Finger Clamp	Standard Laboratory Type	hold larger pieces of glassware and odd-shaped objects
Support Rods	Various Lengths	to mount, elevate, and secure experimental apparatus

02 Heating & Flame Equipment

Product	Variant / Type	Application
Bunsen Burner	Standard Laboratory Type	equipment that produces a single continuous gas flame
Spirit Lamp	Glass & Metal Type	small-scale heating tasks & sterilizing equipment
Meker Burner	Standard Laboratory Type	produce multiple, uniform, and extremely hot blue flames

03 Tripods & Heating Supports

Product	Variant / Type	Application
Tripod Stand	Various Heights	to support flasks and beakers
Wire Gauze	Multiple Sizes	a heat-resistant wire mesh
Support Rings	Multiple Sizes	hold beakers, flasks, and funnels above heat sources

Product images, optical details, packing, and specifications are for reference only. Final model availability and specifications are confirmed at quotation stage.

PRODUCT RANGE

Dissection, Biology & Physics Apparatus

Avrexon Scientific supplies dissection instruments, biology practical tools, and physics measurement apparatus used in school and college science laboratories. The range includes forceps, dissection trays, dissection kits, vernier callipers, micrometers, and basic electrical measuring instruments required for routine practical work and demonstrations.

Product specifications, dimensions, materials, and available variants may vary by supply batch and manufacturer. Final details are confirmed at the quotation stage based on quantity, packing requirements, and dispatch location.

04 Dissection & Biology Tools

Product	Variant / Type	Application
Forceps	Straight & Curved Type	hold, pick, and manipulate small specimens and samples
Dissection Trays	Various Sizes	provides stable surface for dissection & specimen handling
Dissection Kit	Standard Laboratory Type	set of tools for biology practical and dissection work
Scalpels & Blades	Standard Laboratory Type	used for precise cutting during dissection
Probes & Needles	Standard Laboratory Type	separating tissue & directing specimens during dissection
Specimen Jars	Various Sizes	used for storage and display of biological specimens

05 Physics Apparatus & Measurement Instruments

Product	Variant / Type	Application
Vernier Calliper	Standard & Digital Type	precise measurement of length, depth, and diameter
Screw Gauge	Standard Laboratory Type	precise measurement of small thickness and diameter
Voltmeter	Analog & Digital Type	used to measure voltage/potential difference in a circuit
Ammeter	Analog & Digital Type	used to measure electric current in a circuit
Multimeter	Digital Type	used to measure voltage, current, and resistance
Physics Practical Kits	Standard Laboratory Type	sets of basic apparatus for school and college
Galvanometer	Analog & Digital Type	detect and measure small electric currents in a circuit

Product images, optical details, packing, and specifications are for reference only. Final model availability and specifications are confirmed at quotation stage.

PRODUCT RANGE

Basic laboratory equipment for measurement, heating, mixing, and sample processing in routine institutional use.

Avrexon Scientific supplies essential basic laboratory equipment used in schools, colleges, laboratories, dealers, and institutional procurement. The range includes hot plates, magnetic stirrers, weighing balances, pH and TDS meters, thermometers, water baths, centrifuges, and heating mantles for routine analytical, heating, mixing, and sample preparation work.

Product specifications, dimensions, materials, and available variants may vary by supply batch and manufacturer. Final details are confirmed at the quotation stage based on quantity, packing requirements, and dispatch location.

01 Heating & Mixing Equipment

- Hot plates
- Magnetic stirrers
- Heating mantles

02 Weighing & Measurement Instruments

- Weighing balances
- pH meters
- TDS meters
- Thermometers

03 Sample Processing Equipment

- Water baths
- Centrifuges

Available in standard pack sizes. Bulk, dealer, and institutional requirements can be quoted separately.

PRODUCT RANGE

Heating, Mixing, Weighing & Sample Processing Equipment

Avrexon Scientific supplies basic laboratory equipment used for heating, mixing, weighing, temperature measurement, and sample processing in schools, colleges, laboratories, dealers, and institutional procurement. The range includes hot plates, magnetic stirrers, heating mantles, weighing balances, pH meters, TDS meters, thermometers, water baths, and centrifuges.

Product specifications, dimensions, materials, and available variants may vary by supply batch and manufacturer. Final details are confirmed at the quotation stage based on quantity, packing requirements, and dispatch location.

01 Heating & Mixing Equipment

Product	Variant / Type	Application
Hot Plate	Standard / Digital Type	heat liquids and samples on a flat surface
Magnetic Stirrer	With / Without Heating	mix solutions using a rotating magnetic field
Heating Mantle	Various Capacities	provide controlled heating for round bottom flasks

02 Weighing & Measurement Instruments

Product	Variant / Type	Application
Weighing Balance	Digital, Various Capacities	measure mass of samples and chemicals
pH Meter	Digital Type	measure pH of solutions
TDS Meter	Digital Type	measure total dissolved solids in water
Thermometer	Mercury / Digital	measure temperature of samples and solutions

03 Sample Processing Equipment

Product	Variant / Type	Application
Water Bath	Various Capacities	maintain constant temperature for incubation and heating
Centrifuge	Standard Laboratory Type	separate components of a sample by spinning at speed

Product images, optical details, packing, and specifications are for reference only. Final model availability and specifications are confirmed at quotation stage.

PRODUCT RANGE

Specialized Equipment & Custom Sourcing Support — Available on Quotation

Avrexon Scientific supports sourcing of specialized and higher-value laboratory equipment, including incubators, laboratory ovens, autoclaves, and advanced physics apparatus, along with custom laboratory setups and institutional supply requirements. These items vary significantly by brand, capacity, and specification, and are supplied on a quotation basis tailored to the buyer's exact requirement.

Product specifications, dimensions, materials, and available variants may vary by supply batch and manufacturer. Final details are confirmed at the quotation stage based on quantity, packing requirements, and dispatch location.

01 Specialized Equipment

Product	Variant / Type	Application
Incubator	Various Capacities	maintain controlled temperature for sample incubation
Laboratory Oven	Various Capacities	dry, sterilize, and heat-treat lab samples and glassware
Autoclave	Various Capacities	sterilize equipment and media using pressurized steam

02 Custom & Institutional Sourcing Support

Product	Variant / Type	Application
Advanced Physics Apparatus	As per requirement	support advanced practicals and demonstrations
Custom Laboratory Setup	As per requirement	source complete lab setups for new or expanding facilities
Institutional Lab Requirements	As per requirement	consolidated sourcing support for bulk institutional orders

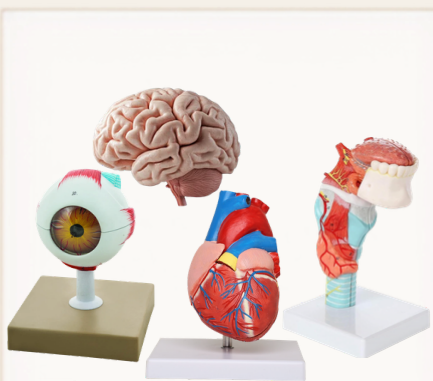

Product images, optical details, packing, and specifications are for reference only. Final model availability and specifications are confirmed at quotation stage.

PRODUCT RANGE

Anatomical models, charts, and preserved specimens for biology and life-science laboratories.

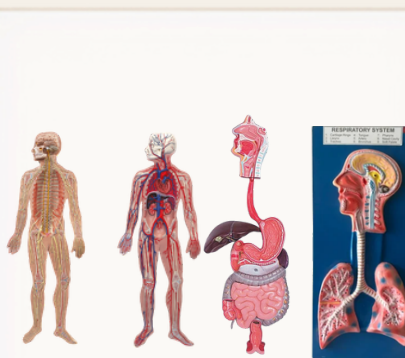

Avrexon Scientific supplies a curated range of anatomical models, science charts, and preserved specimens for schools, colleges, and institutional biology laboratories. The range includes human organ models, body system models, skeleton and torso models, educational wall charts, and preserved wet and embedded specimens for practical demonstration and classroom display.

Product specifications, dimensions, materials, and available variants may vary by supply batch and manufacturer. Final details are confirmed at the quotation stage based on quantity, packing requirements, and dispatch location.

01 Human Organ Models

- Eye, ear & brain models
- Heart, lung & kidney models
- Larynx & teeth with jaw models

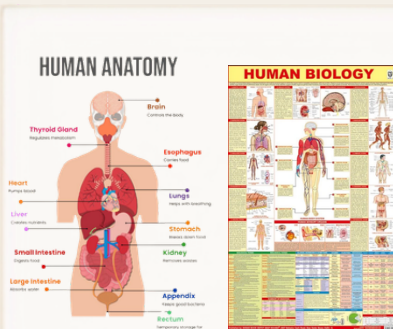

02 Body System Models

- Circulatory & nervous system
- Respiratory & digestive system
- Reproductive system (male/female) models

03 Skeleton & Torso Models

- Full human skeleton models
- Small torso models
- Skin, head & neck, and pelvis with baby models

04 Science Charts

- Human anatomy charts
- General biology and science wall charts
- Laminated classroom charts

05 Preserved Wet Specimens

- Preserved biological specimens in jars
- Animal and insect specimens
- Dissection demonstration specimens

06 Embedded Specimen Displays

- Plastomount / embedded specimen blocks
- Insect small-organism display sets
- Classroom demonstration sets

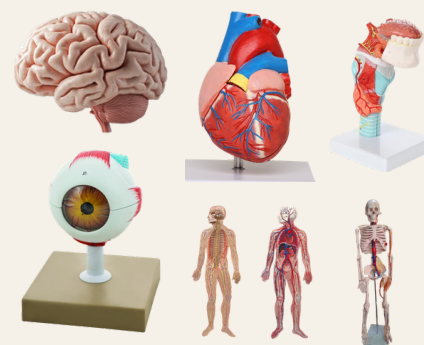

Available in standard pack sizes. Bulk, dealer, and institutional requirements can be quoted separately.

PRODUCT RANGE

Human Organ, Body System & Skeleton Models

Avrexon Scientific supplies anatomical models for schools, colleges, training institutes, laboratories, dealers, and institutional procurement requirements. The range includes human organ models, body system models, skeleton models, torso models, and related anatomical teaching aids for biology laboratories.

Available models, sizes, materials, mounting, and packing may vary by supplier batch and order quantity. Final specifications are confirmed at the quotation stage based on requirement, availability, and dispatch location.

01 Human Organ Models

Product	Variant / Type	Application
Eye model	Demonstration model with base	Eye anatomy teaching and demonstration
Ear model	Sectional demonstration model	Ear anatomy teaching
Brain model	Anatomical demonstration model	Brain structure study and classroom teaching
Heart model	Sectional demonstration model	Heart structure and circulation teaching
Lungs model	Anatomical demonstration model	Respiratory system teaching
Kidney with bladder model	Sectional demonstration model	Excretory system teaching
Larynx model	Anatomical demonstration model	Voice box and respiratory anatomy teaching
Teeth with jaw model	Full jaw demonstration model	Dental anatomy teaching

Suitable for biology laboratories, schools, colleges, and institutional anatomy teaching requirements.

02 Body System Models

Product	Variant / Type	Application
Circulatory system model	Full-body anatomical model	Blood circulation and vascular system teaching
Nervous system model	Full-body anatomical model	Nervous system structure teaching
Respiratory system model	Anatomical demonstration model	Respiratory system teaching
Digestive system model	Anatomical demonstration model	Digestive system teaching
Reproductive system model	Male / female anatomical model	Reproductive system teaching

Used for body system teaching in biology laboratories, schools, and colleges.

03 Skeleton & Torso Models

Product	Variant / Type	Application
Human skeleton model	Standard size, mounted on stand	Skeletal system teaching and demonstration
Torso model	Small size, removable organs	Whole-body anatomy teaching
Skin model	Sectional demonstration model	Skin structure and layers teaching
Head & neck model	Sectional anatomical model	Head and neck anatomy teaching
Pelvis with baby model	Anatomical demonstration model	Pregnancy and reproductive anatomy teaching

Suitable for biology laboratories, demonstration setups, and classroom anatomy teaching.

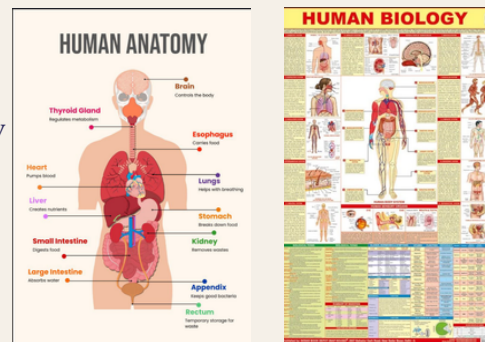

Product images, optical details, packing, and specifications are for reference only. Final model availability and specifications are confirmed at quotation stage.

PRODUCT RANGE

Science Charts, Preserved & Embedded Specimens

Avrexon Scientific supplies science charts and preserved biological specimens for schools, colleges, training institutes, laboratories, dealers, and institutional procurement requirements. The range includes laminated anatomy and biology wall charts, wet preserved specimens in glass jars, and embedded plastomount specimen displays for classroom and laboratory use.

Available chart titles, specimen types, jar sizes, and packing may vary by supplier batch and order quantity. Preserved specimen items are dispatched on request, with packing and transit terms confirmed separately. Final specifications are confirmed at the quotation stage based on requirement, availability, and dispatch location.

04 Science Charts

Product	Variant / Type	Application
Human anatomy chart	Laminated wall chart	Human body systems teaching
Human biology chart	Laminated wall chart	General biology topics teaching
Organ system charts	Set of laminated charts	Individual system teaching such as digestive, respiratory, and circulatory
Skeletal & skull charts	Laminated wall chart	Skeletal system teaching
Plant & cell biology charts	Laminated wall chart	Cell structure and plant biology teaching
General science chart sets	Laminated classroom set	Classroom display and reference

Suitable for classroom walls, laboratory display boards, and institutional teaching requirements.

05 Preserved Wet Specimens

Product	Variant / Type	Application
Preserved frog specimen	Glass jar, wet preserved	Dissection and life cycle teaching
Preserved fish specimen	Glass jar, wet preserved	Vertebrate anatomy teaching
Preserved earthworm specimen	Glass jar, wet preserved	Invertebrate anatomy teaching
Preserved insect specimen	Glass jar, wet preserved	Insect anatomy teaching
Preserved crustacean specimen	Glass jar, wet preserved	Crustacean anatomy teaching

Suitable for biology practicals and demonstration. Dispatched on request with packing and transit terms confirmed separately.

06 Embedded Specimen Displays

Product	Variant / Type	Application
Embedded insect specimen	Acrylic block, single specimen	Insect morphology display and teaching
Embedded small fish specimen	Acrylic block, single specimen	Vertebrate morphology display
Embedded plant specimen	Acrylic block, single specimen	Plant morphology display
Embedded crustacean specimen	Acrylic block, single specimen	Invertebrate morphology display
Assorted embedded specimen sets	Set of acrylic blocks	Classroom demonstration and reference collection

Suitable for classroom display, reference collections, and institutional teaching requirements.

Product images, optical details, packing, and specifications are for reference only. Final model availability and specifications are confirmed at quotation stage.

Working With Avrexon Scientific

Commercial Terms

- All pricing is quotation-based, confirmed fresh at the time of order based on item, quantity, packing, and dispatch location.
- Unless otherwise specified, prices are ex-works Ambala Cantt. GST is charged extra as applicable. Freight and packing charges are extra unless otherwise agreed at the quotation stage.
- Quoted rates are valid for 7 days from the date of quotation. Beyond this period, rates are subject to reconfirmation.
- Rates are subject to change due to raw material, gas, and market price fluctuations.
- Product specifications, dimensions, materials, and available variants may vary by supply batch and manufacturer. Final details are confirmed at the quotation stage.

How to Request a Quotation

- Share your requirement list via email or phone.
- Include product names, quantities, and any specification preferences.
- We will respond with a detailed quotation covering pricing, availability, packing, and estimated dispatch timeline.
- Repeat orders and institutional tenders are welcome.

Payment Terms

- For new accounts, full or partial advance payment is required before dispatch.
- All orders are processed against a confirmed purchase order or written confirmation.
- Bank details for payment are shared at the time of order confirmation.

Dispatch & Delivery

- Dispatch timelines are confirmed at the quotation stage and may vary based on item availability and transporter schedules.
- Once goods are handed over to the transporter, responsibility for transit lies with the buyer unless otherwise agreed in writing.
